

I subscribe to satellite radio and I believe it is my freedom of choice and right to be able to receive local traffic and weather information from my satellite radio service. I oppose NAB's petition 04-160 as an American and the basis this country was built upon.

I actively choose NOT to listen to other broadcasting stations because the majority of their broadcast is commercials and/or games. I don't tune in for these reasons. I tune in for education of weather/traffic, non-stop music, and comedy relief during rush hour driving, among other times.

Please do not cave to the paid lobbyists on 04-160 and forget about the real taxpayers and people who keep this country progressing forward. Thank you.
